

REPRC status update

Bruce Libby, PhD, FAAPM

Chair, REPRC

Please remember

- All CAMPEP officials and reviewers are volunteers (except George Starkschall)
- Respond to requests from CAMPEP and lead reviewers in a timely manner
- (also a reminder to reviewers to complete reviews in a timely fashion)

Recent Residency Accreditation History

- 2022: 6 new programs accredited
- 2023: 4 new programs accredited
- 2024: 11 new programs accredited
- 2025: 4 new programs accredited, 17 more in various stages of review

Program accreditation update

- All self studies from 2024 and earlier have review teams assigned
- Numerous new programs that submitted self studies in 2025 have review teams assigned
- 38 programs currently are in various stages of review
- 7 other new programs need review teams

New programs needing review teams

- Landauer IR (program is redoing application)
- WVU therapy
- Providence Cancer Institute therapy
- Precess Medical Derivatives therapy
- Advent Health Rock Mountain therapy, affiliate
- Accelerated Medical Physics Services therapy
- Minneapolis Radiation Oncology therapy

2025 program reaccreditation update

- All through Apply system
- Some have have review teams assigned, the reviewers are all working through the Apply system
- Priority post AAPM is to have review teams assigned for the new programs and start working through the 2025 reaccreditations

Other REPRC issues

- Do we want to have a standard and official role for associate program director? **Will update the language in standard to require the program to state who will take over if the program director cannot fulfill duties (ie-medical leave, etc)**
- Should we edit the standard regarding steering committee meetings to state that it should have been organized and met prior to self study submission?- **will update guidance language in self study template**
- Update of IT issues and possible solutions

Affiliate programs.....

- More to come, many discussions about affiliate programs at REPRC and CAMPEP Board of Directors meeting
